Literary Review of the World - Swift

By Shomit Sirohi

I. Europe and Politics – Nunes, Macron, Syriza

In a review of the novel as such then, there is a political actor who then leads each country, Spain for instance under Nunes, People's Party which then has won election this recently and is in fact with Sanchez. Reviews of EU dynamics also are another architecture for Europe.

Now literature abounds with figures – in fact representation-figures – offices, government offices, computers and transactions, even a full flow of people and protests and a lot of finance and economics and even forms of agrarian politics, agrarian fields and forms of dynamics of all that economics – forms of cultural prospects – like Spanish, Madrid, Sevilla, Granada and even forms of resteraunts, cafes, and architectural forms all being the news in literature. In Greece, hotels and housing and protests and even Communist parties in the mix of it with a lot of parties demonstrating.

II. The Unthinkable Swift – A Novel interpreted by Warren Montag

In fact Montag means that it is Swift that reveals the swift nature of things – it is like being in car in Madrid and being swift about it, a lot of swiftness in history and everywhere.
